## WHY COLLAGEN CREAM?

- To support the skin's moisture balance and promote the look and feel of fresh, youthful skin.
- To help deliver moisture to thirsty skin cells being dried out by environmental factors such as sunshine, dry air and cold temperatures, and as the result of age-related loss of moisture.
- To help cells close to the skin surface function as plump, young cells by adding easily-absorbed, moisture-rich ingredients.
- To help diminish fine lines by smoothing the skin surface with soothing ingredients that work in conjunction with the skin's natural moisture balance, without relying upon components such as mineral oil that can have a greasy feel, and over time leave your skin more prone to dryness.
